

Project Classification: Construction Management

Project Scope

Project in future development - Bid opening expected Winter 2017/2018 - Construction expected to begin Winter 2017/2018.

This project proposes to insure the preservation of three (3) existing bridges in Nassau & Suffolk Counties to help maintain bridge reliability and integrity to assure the continued safety of the traveling public. The work may include all or some of the following: the removal and replacement of existing steel bearings with elastomeric bridge bearings, the reconstruction of bridge bearing pedestals and anchor bolts, repairs to concrete pier cap beams, removal and replacement of deck joint systems, and reconstruction of deck slabs at deck joint regions, reconstruction of concrete back walls, reface and retrofit abutment stems with concrete and other miscellaneous concrete substructure patch repairs. One bridge will have replacement of asphalt wearing surface overlay, after milling to remove the existing, installation of a waterproof membrane, and paving of the new asphalt wearing course overlay. This type of corrective maintenance helps extend the life of the bridges. The three (3) bridges included in this project are: NY107 over Sea Cliff Ave in the City of Glen Cove, Town of Oyster Bay, Nassau County; NY110 over NY109 in the Town of Babylon, Suffolk County; Northern State Parkway (908G) over Round Swamp Rd. in the Town of Huntington, Suffolk County.
